OIT-0287-87  
20 May 1987

MEMORANDUM FOR: Deputy Director for Administration

FROM: Edward J. Maloney  
Director of Information Technology

SUBJECT: Weekly Report for Week Ending 22 May 1987

25X1

2. A classification hotline number has been advertised in a VM message advising employees of the availability of help with document classification markings and requirements. The hotline has already provided document classification assistance to individuals in the Office of Scientific and Weapons Research, the Office of Personnel, the Office of Soviet Analysis, and the Office of Logistics. [REDACTED]

25X1

3. The two leased high-speed lines between Headquarters and [REDACTED] have been out of service for several weeks. AT&T has taken several steps to resolve the problem, but test results so far indicate the problem still exists. OIT personnel will meet next week with AT&T representatives to further evaluate the test data and identify appropriate corrective actions. An alternate route for communications is still being provided by the microwave system. [REDACTED]

25X1

4. Acceptance testing of SAFE Delivery 3.1 is underway at the Defense Intelligence Analysis Center at Bolling Air Force Base. Twenty personnel are working half-day shifts in the Defense Intelligence College to perform all of the procedures specified in the acceptance test plan. To date, nearly 100 trouble reports have been written concerning a variety of problems. While problems are being resolved, customer representatives and OIT personnel are proceeding with the remainder of the test plan. [REDACTED]

CONFIDENTIAL

5. Consolidated SAFE Program Office (CSPO) personnel met with DIA personnel to answer general feasibility questions on potential use of SAFE as a basis for the Time Sensitive Support System at the National Military Intelligence Center in the Pentagon. It appears to be a viable candidate if changes are made to support 24-hour-per-day service and certain display capabilities. The DIA personnel were advised on what steps to take to obtain CSPO support.
